Important information to be read before completing the template:

All marine engines placed on the EU/EEA market shall have an EU Declaration of Conformity (EU DoC).

The Directive specifies what information the EU Declaration of Conformity shall contain but does not specify the format.

A harmonised format for an EU DoC has been created as an answer to manufacturers' and Notified Bodies' requests for an interpretation of the statutory requirements of the Directive as guidance.

The document has been agreed by market surveillance representatives from Member States (ADCO Group) and it provides all the information judged necessary to satisfy the market surveillance authorities in the EU/EEA Member States.

Although it is recommended to follow this template, economic operators are not required or bound by this template.

In particular, when the Directive is applicable in conjunction with another EU act.

It must be noted that the model of the EU DoC is specified in Annex IV of the Recreational Craft Directive 2013/53/EU.
